PROFESSIONAL EXPERIENCE

QuickFuel, Lahore
Angular Developer, April 2020 - May 2023

Quickfuel is an Australian-based fuel management company that provides a range of services to businesses. Their services include fuel supply, delivery, storage, and management, as well as a comprehensive fuel management software to help customers track and manage their fuel usage and costs.

➢ **Achievements/Tasks**
   ◆ Worked on Microsoft SQL Server as well like query running data analysis and Data Retrieve.
   ◆ Taking requirements from seniors to create model, components in angular using material.
   ◆ Do frontend developments using Angular and also working on report through Telerik reports Interface for transaction and audit weekly for there software through Query.
   ◆ Data retrive through Api in Telerik Interface that served data to the front-end based on Angular 13.
   ◆ Errors in the console from the front-end, find and understand the type of error and its root cause. Review the code related to the error message and check for syntax errors, missing or incorrect variable names, and incorrect function calls.
   ◆ Use the debugger tools in the console to debug your code. Set breakpoints and step through the code to identify the root cause of the error.

➢ **Personal Projects**
   Quickfuel BackOffice (06/2021-05/2023)

   ◆ Planning and designing with the product manager to completely

redesign the desktop application into a web application using angular 14, and SQL server.

◆ Design reports through Telerik Interface for transaction and audit for there software.

◆ Data retrieve through Api in Telerik Reporting and show data in front end on Angular 13

➢ **Telerik Reporting (04/2021 - 05/2023)**

◆ The interface includes a toolbox with a range of report items, such as tables, charts, and gauges, that can be easily added to reports. Users can also add data sources, group and sort data, and apply filters and expressions to create dynamic reports.

◆ Using Data Source Components: Telerik Reporting provides built-in data source components such as SqlDataSource, ObjectDataSource that can be used to retrieve data from databases, objects files respectively.

◆ Using Web Services: Telerik Reporting supports web services as a data source. Users can connect to a web service, specify the method to retrieve data, and use the data in the report.

AEO Pakistan, Lahore
IT Engineer*, November 2023 - May 2024*

◆ **Problem-Solving:** Troubleshoot complex issues related to hardware, software, network and security systems.
